## Defense Acquisition University Online Virtual Tour

### Welcome to the DAU Online Resources Tour!

DAU has developed many on-line resources available for the DoD AT&L workforce, industry partners, and other Federal, State, and Local government.

These on-line resources provide you with the ability to apply for a course, take a continuous learning module for continuous learning credit to related learning and knowledge content, ask a professor a question, contribute knowledge objects (such as lessons learned, best practices) with your peers on work issues.

These on-line resources were developed in support of Acquisition, Technology, & Logistics's Performance Learning Model (PLM): A Net Center represents a complete learning environment, 24/7, whenever and wherever you need it to improve your performance.

- DAU Online Virtual Tour - Interactive
- DAU Online Virtual Tour - Continuous
- DAU Offline Virtual Tour - Continuous

Once you have viewed the above to get a general overview of the resources available, we suggest you view the following module which will help you and using the on-line assets in solving a real problem – the development of a Unique Identification (UID) Plan. This will give you a more detailed view of the process.

- Unique Identification Plan Example

- 
- Video - The Winning Edge (Overview of the Defense Acquisition University)
  - Defense Acquisition University, Performance Learning Roadmap
  - Links to DAU On-Line Resources
-

## Defense Acquisition University's iCatalog

DAU's Interactive Catalog (iCatalog) provides the most up-to-date information regarding the university's classroom and online learning assets. Here you will find all you need to know regarding the university's:

- regular (certification and assignment specific) training courses;
- continuous learning courses;
- the various acquisition career field certification & Core Plus Development Guides; and
- alternate means to meet training requirements
- and much more.

To begin your journey, select one of the below listed topics.

*DAU's printed catalog is published annually on Oct. 1st of each year. The printed catalog contains information accurate as of the date it was published. Our most recent edition as well as past issues dating back to 2001 are available on-line in PDF form. [Click here](#) to view, print or download all or excerpts of our past DAU catalog issues. Please keep in mind that updates and changes after publication are captured in our iCatalog. The iCatalog is your source for the most current information.*

# Defense Acquisition Guidebook

The screenshot shows the Defense Acquisition Guidebook homepage as it appeared in 2008. The browser window is titled "Defense Acquisition Guidebook - Microsoft Internet Explorer provided by Defense Acquisition University" and the address bar shows "https://akss.dau.mil/dag/". The page features a blue header with the "Defense Acquisition Guidebook" logo and the tagline "Your Acquisition policy and discretionary best practice guide". A navigation bar includes links for "Home", "Contact", "Search", and "Help". On the left, a sidebar lists various resources like "DAU Homepage", "I Need Training", and "Knowledge Sharing". The main content area is titled "Welcome to the Defense Acquisition Guidebook Homepage" and contains a red notice about a new DoD Instruction 5000.02. It explains the purpose of the Guidebook and provides navigation instructions. Three tabs are visible: "Document View", "Life Cycle Framework View", and "Functional/Topic View". A list of instructions guides the user on how to use each tab. At the bottom, a "TUTORIAL" section encourages users to review the Guidebook's capabilities. The Windows taskbar at the bottom shows the Start button, several open applications including "My Documents", "Microsoft PowerPoint", and "Defense Acquisition G...", and a system clock showing 11:18 PM.

## Welcome to the Defense Acquisition Guidebook Homepage

Effective 8 December 2008, a new DoD Instruction 5000.02 has been issued. It cancels DoD Instruction 5000.2, dated 12 May 2003. Correspondingly, the Defense Acquisition Guidebook is in revision to reflect the new DoDI 5000.02. For the interim, all links in the Guidebook to the cancelled DoDI 5000.2 are redirected to the PDF Version of the DoDI 5000.02. You can access the new DoDI 5000.02, page 1, via this link: [Go to DoDI 5000.02](#). Upon its release, the revised Guidebook will include updated links to the correct sections and specific pages of the new DoDI 5000.02.

The purpose of the Guidebook is to provide members of the acquisition community and our industry partners with an interactive, on-line reference to policy and discretionary best practice. Consider the Guidebook a valuable resource as you design your programs.

### NAVIGATION

To enter and navigate the Guidebook, select one of the following tabs below (and in the header of the Guidebook pages), to view the content in one of three ways according to your need:

[Document View](#) [Life Cycle Framework View](#) [Functional/Topic View](#)

- Select the [Document View](#) tab to review Guidebook information page-by-page.
- Select the [Life Cycle Framework View](#) tab to review statutory and regulatory requirements and related best practice for each milestone and acquisition phase.
- Select the [Functional/Topic View](#) tab to review comprehensive discussions of key acquisition topics.

To maximize the utility of this system, we recommend you use a computer that has Internet Explorer 6.x or higher at a resolution of 1024 x 768 or higher and have JavaScript enabled. The hardware requirement is whatever is necessary to support Internet Explorer 6.

[Click here](#) to access pdf files of the Guidebook content that are readable per Section 508 and to print.

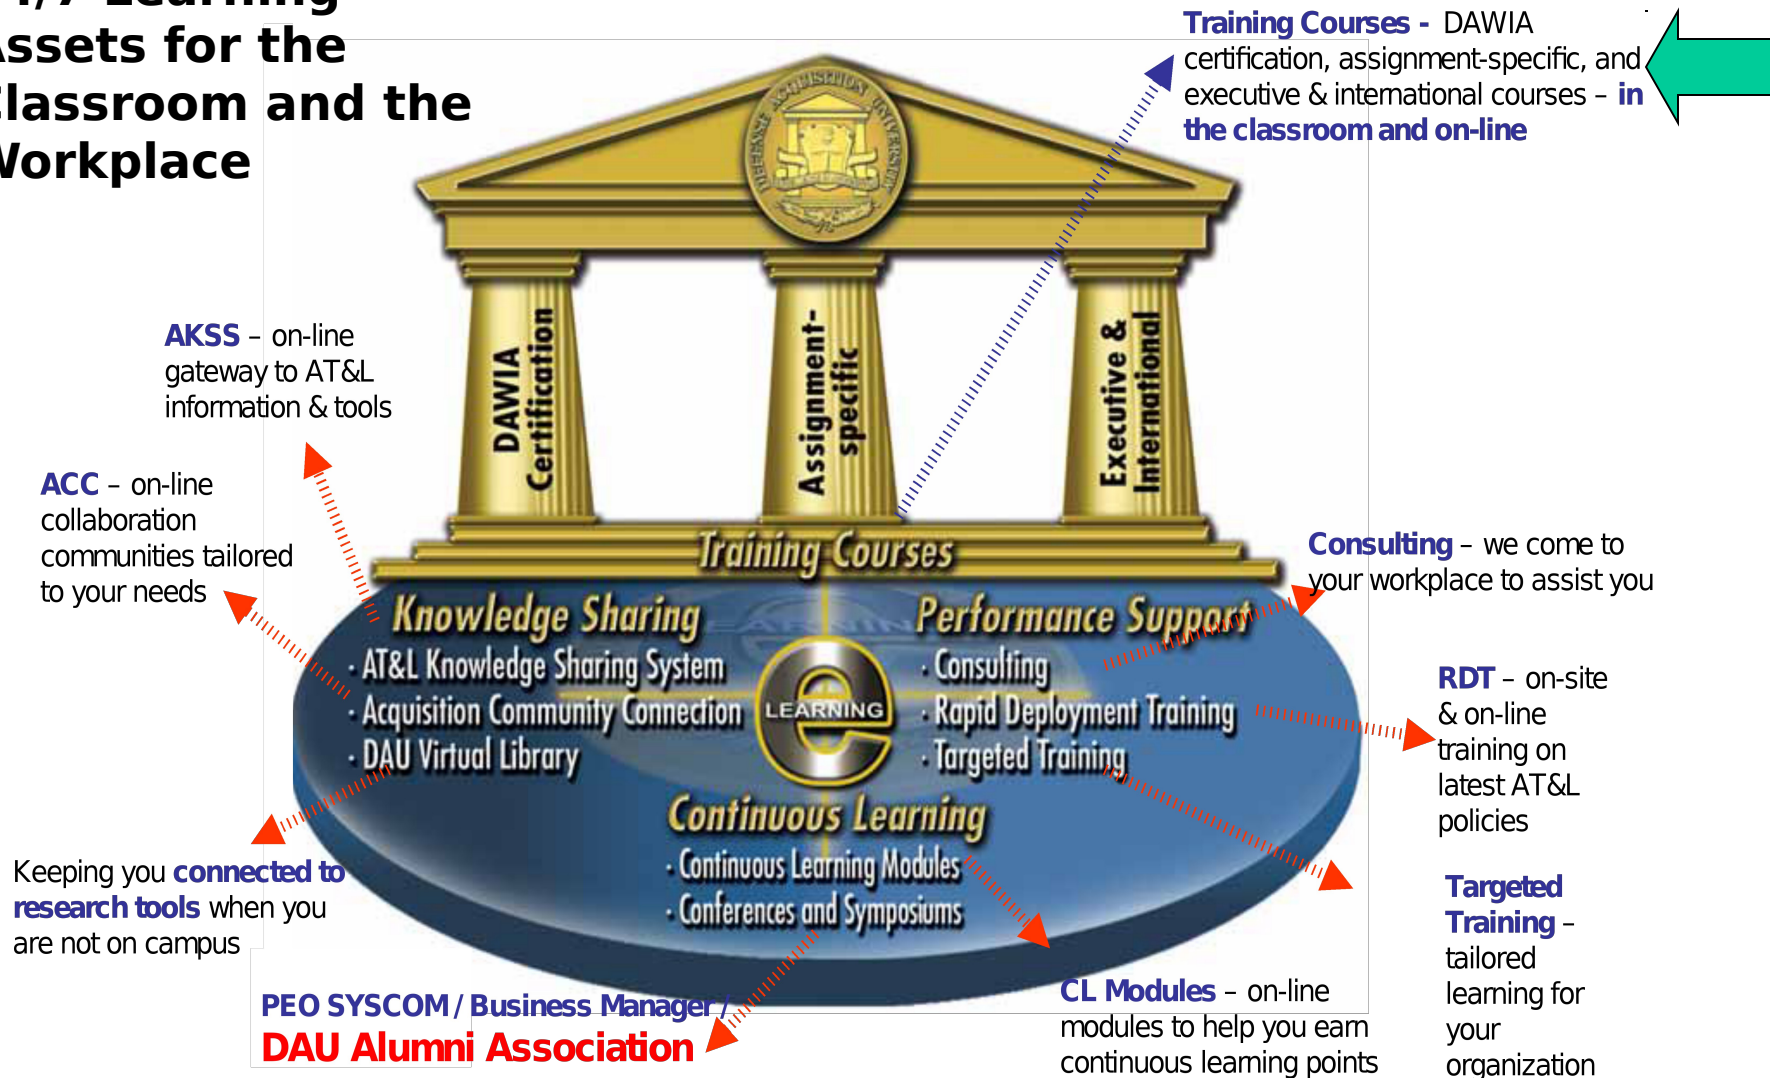

### TUTORIAL

A more detailed discussion of Guidebook capabilities can be accessed via the [Guidebook Tutorial](#). You are encouraged to review the tutorial to understand all the capabilities the Guidebook provides.

### AT&L Knowledge Sharing Update

**M&S Planning and Employment Best Practices:** This requests your voluntary assistance in defining best practices for the planning and employment of modeling and simulation. The Acquisition Modeling and Simulation Master Plan (AMSMP), issued by DoD's Systems Engineering Forum on April 17, 2006, contains an action (4-2) to "Define and disseminate best practices for disciplined M&S planning & employment." The rationale for this action is that acquisition program teams often lack the expertise to do this well. Knowledge of the best practices will inform that decision process, improve the cost-effectiveness of a program's M&S activities, and benefit others that may reuse that program's M&S artifacts. The Acquisition M&S Working Group (AMSWG), the governmental body charged with compiling these best practices, is seeking voluntary inputs from any organization that has standard or recommended practices for any of the following aspects of the M&S planning and employment:

- M&S planning policies, including plan formats, coordination, and oversight
- Identification and analysis of M&S objectives and relevant scenarios
- Determination of what should be represented in M&S (conceptual modeling)
- Identification and analysis of implementation constraints
- Identification and analysis of alternative solutions including the

Most of us now know and understand what we have come to call our Performance Learning Model or PLM. It is an overarching learning model, and it helps us focus on a broader mission, that includes not only training, but the additional learning assets we provide. As we have evolved, so too has the PLM. Using this new paradigm, DAU will help provide a learning environment for all AT&L organizations where they can't help but learn, balancing what we now provide—training courses, knowledge sharing, continuous learning, performance support, and rapid deployment training—with local learning resources and infrastructure via a learning network.

This learning network emphasizes connectivity where our customers can seamlessly access a variety of learning assets. With the PLM as a foundation, the DoD AT&L workforce will have a more flexible, responsive, and agile learning environment. This customer-focused approach will significantly contribute to AT&L Goal 1--High Performing, Agile, and Ethical Workforce. We are extending our learning reach beyond the classroom so that we can maintain a continuous presence with our field organizations and our partners in the workplace.

PLM...What has evolved? The icon looks the same, but the meaning is now more workplace-inclusive and far more powerful. We will never return to the constraints of a classroom-only environment, as we continue to expand our support to the learning needs of the DoD AT&L community.
